

Investment Quality Data for NZC Reporting

ESG reporting expectations have evolved to financial and government standards
Be ready with the Enterprise Infrastructure Partners Net Zero Cloud Connector

Enterprise
Infrastructure
Partners

Completely Automated, Verifiable, Extraction, Transformation, Load from virtually any data source

VERIFIABLE

- Hands off programmatic data load, load and update, and delete features
- Immediate exception reporting for timely action
- Confidently present reporting with VERIFIABLE data with included Data Audit application
- Browse and present investment quality (IQ) data with a COMPLETE audit trail from data source to load

DON'T SETTLE FOR GOOD ENOUGH

Investors:

- Trust business leaders that credibly collect IQ data
- Consider collection and usage of IQ data good management
- Are more likely to invest in companies that collect and use IQ data

PRODUCTION QUALITY

- Private link data transfers for added security
- Unlimited scalability with AWS global infrastructure
- Encrypted data at rest and during transfer
- Serverless implementation reduces malware risks

- Solve ESG data gathering and maintenance challenges
- Paper data loading available
- Realize the value of **investment** quality data
- Reduce risks of inaccurate reporting

- Impact sustainability goals to improve ESG scores
- Give Line of Business managers the ability to meet company mandates
- Does not interrupt scheduled IT project schedules
